

eNepMathResistorVoltageDivider
GetVout

```
graph LR; A["eNepMathResistorVoltageDivider  
GetVout"] --> B["eNepMathDivisionU32"]
```

The diagram illustrates a function call. On the left, a gray rectangular box contains the text "eNepMathResistorVoltageDivider" on the top line and "GetVout" on the bottom line. A dark blue arrow points from the right side of this box to the right side of another rectangular box on the right. This second box is white with a black border and contains the text "eNepMathDivisionU32".
